Horse 15.3 - 16.2hh Up to 600kg	1.5	1.75	2
Horse 16.2 - 17hh + Up to 900kg	1.75	2	2.5

EquidGrass™ Mixing Instructions

EquidGrass™ is a 100% Grass chop complementary feed which can be fed on its own or mixed with EquidGel® or LamiGel to make a 'chewy' consistency, however both EquidGel® and LamiGel™ should always be mixed with extra water first before adding the EquidGrass™. The feed guide should always be consulted to manage the recommended daily amounts which can be split into smaller feeds.

Please Note: If EquidGrass™ is fed as a complimentary feed on its own, it is recommended that it is dampened with water before being fed.
