Horse 15.3 - 16.2hh Up to 600kg	200g	250g	300g
Horse 16.2 - 17hh + Up to 900kg	300g	350g	400g

LamiChop™ Mixing Instructions

LamiChop™ is a natural Alfalfa complementary feed which can be fed on its own or mixed with EquidGel® or LamiGel to make a 'chewy' consistency, however both EquidGel® and LamiGel™ should always be mixed with extra water first before adding the LamiChop™. The feed guide should always be consulted to manage the recommended daily amounts which can be split into smaller feeds.

Please Note: If LamiChop™ is fed as a complimentary feed on its own, it is recommended that it is dampened with water before being fed. LamiChop is ideal to be used to bulk out a feed, however it is not recommended to feed Oat straw in large quantities as it may cause blockages.
