

Delivering Hydration & Nutrition On Demand

LamiGel™ is a natural 90% fibre based, 100% natural, equine feed system delivering hydration and nutrition on demand, however it has been especially formulated with a lower sugar (less than 3%) and protein (less than 12%) content. High fibre, low sugar and starch with no additives, chemicals, NIS or GMO's.

The level of Omega-3 oil provides slow release energy and helps to support the cardiovascular system; the soluble fibre gel provides an increase in gastrointestinal fluid to help to reduce the effects of dehydration and fatigue.

LamiGel™ has been especially formulated with a lower sugar and protein content, which may be particularly beneficial to horses that are good doers, geriatrics or prone to Metabolic disorders such as Equine Gastric Ulcer Syndrome and Laminitis. LamiGel™ may also have the beneficial effect of reducing excitable behaviour; it has been documented that the soluble fibre gel may also form a barrier between the contents of the stomach and the gut wall reducing the absorption rate of carbohydrates into the blood stream.

LamiGel™ is suitable as a daily feed to be fed alongside forage for horses that are on a maintenance diet or in light work.

LamiGel™ Nutritional Analysis

	Nutritional Analysis								
Product	Digestible Energy MJ/kg	Crude Protein g/100g	Fats and Oil g/100g	Crude Fibre g/100g	Ash g/100g	NDF g/100g	Sugar g/100g	Starch g/100g	Sodium g/100g
LamiGel™	6.6	9.7	2.8	33	6.4	52.7	2.3	2.3	0.1

LamiGel™ is a growing crop; therefore the nutritional analysis may vary.
Ingredients: Alfalfa Meal, Oatstraw Meal, Omega 3 oil from plant source.

LamiGel™ Daily Feeding Guide

Type and Weight	Workload MJ/DE Values from (NRC)			LamiGel (Approximate guide only)			Water (ltrs) (Values within recommended levels)		
	Idle*	Average	Elevated	Idle/One off drink	Average	Elevated	Idle/One off drink	Average	Elevated

Horse 16.3hh - 17hh + Upto 900kg	115	126	137	500g	2kg	3.5kg	10 ltrs	25 ltrs	40 ltrs

LamiGel™ Instructions

LamiGel™ is to be mixed at a ratio of 100g per 2 litre of water for the correct consistency. The feed guide should always be consulted to manage daily amounts which can be split into smaller feeds. LamiGel™ should be fed in conjunction with the forage ration (hay/haylage or grass ration); however if a 'chewy' feed is required, then LamiGel™ should always be mixed with water first before adding to EquidGrass™, LamiChop™ or any other non molassed chaff. The amounts shown for idle/light work can also be used when feeding LamiGel™ for hydration.

Please Note: LamiGel™ should never be fed dry or sprinkled onto other dry feeds. A fresh, clean supply of water should always be available.
